1.0 ACPE contact hour
1.0 *AMA PRA Category 1 Credit™*
1.0 ANCC contact hour
1.0 CCM clock hour
1.0 Participation

### OVERVIEW

With ever-expanding treatment options, there are numerous factors to consider when selecting therapies for patients with smoldering multiple myeloma or relapsed/refractory multiple myeloma, as there is no standardized approach. Treatment needs to be individualized based on risk for smoldering multiple myeloma or relapsed/refractory multiple myeloma based on prior therapies, patterns of resistance, patient comorbidities, and disease biology (including cytogenetic risk).

**PRESENTED BY:**

**Muhamed Baljevic, MD**
*University of Arkansas for Medical Sciences*

**Sarah Profitt PharmD, MMHC, BCOP**
*Vanderbilt-Ingram Cancer Center*

### LEARNING OBJECTIVES

- Individualize risk-based treatment for patients with smoldering multiple myeloma.
- Select optimal sequencing for patients with previously treated multiple myeloma based on individual patient and disease characteristics.
- As appropriate, integrate bridging therapy to maintain CAR-T eligibility in patients with multiple myeloma.

### TARGET AUDIENCE

This program is designed to meet the educational needs of physicians/oncologists, nurse practitioners, nurses, physician associates, pharmacists, and other health care professionals who manage patients with cancer.
